Art Unit: 3634

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-11, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Clark. Clark discloses a first panel (C), a second panel (D), a first and second seal (18 and 19) engaging one another in the closed position such that the foamed seal is compressed into sealing contact, a tilted track (13 and 14) mounting the first and second panel, and an actuation system (52) driving the first and second panel to a closed position.

Claims 28 and 29 are further rejected under 35 U.S.C. 102(b) as being anticipated by Saucier. Saucier discloses a plurality of panels (12-16) having extruded sealing elements (22-26) attached to a front portion of the panel and extruded sealing elements (18-21) attached to a rear surface of the panels such that as one panel is moved linearly the rear portion sealingly engages a front portion thereby closing an opening.

The applicant's arguments have been considered but are not deemed persuasive. The applicant argues that Clark fails to disclose "...and positions the second distal end between the first distal end and at least one of the first door panel and the first attachment end". As shown in Figures 1, 11, and 15, Clark clearly shows this broad recitation/limitation of the position of the door with respect to the seals and the opening. Furthermore, the applicant states that Clark fails to disclose the first and

second sealing surface being in a "facing" relationship. As specifically shown in Figures 11 and 15, Clark discloses the first and second sealing arrangements facing each other. Still furthermore, the applicant relies on "adapted to" and "for" clauses as claim limitations in claims 15, and 28, but these phraseologies fail to positively recite the claim language, which the applicant is arguing.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Jerry Redman at telephone number 703-308-2120.
